

Gehad Baleegh

ENTRY-LEVEL ODOO DEVELOPER

Giza, Cairo | +201001069027 | gehadb66@gmail.com | LinkedIn | GitHub

Objective

Detail-oriented entry-level Odoo Developer with foundational experience in Python and Odoo ERP, seeking an opportunity to contribute to ERP development, customization, and continuous system improvement.

Experience

2COOM | Python Developer

Jun 2025 – Oct 2025

- Built mobile app backends using FastAPI, designing scalable APIs and handling complex business logic.
- Deployed and managed projects with Docker on Linux, ensuring consistent environments and easy scalability
- Designed and optimized database relationships, implementing efficient schemas and query handling for relational data.

Courses

- **Information Technology Institute (ITI)** | Full Stack Development Using Python, Intensive Code Camp (ICC) program
- **Petra Software** | The Database (MY SQL) Training
- **Information Technology Institute (ITI)** | Fundamentals of Network Security

Projects

School Management Module

- Developed a comprehensive School Management Module handling students, teachers, parents, uniforms, and academic operations, with role-based access and efficient data management.

Hospital Management System HMS

- Developed a Hospital Management System (HMS) enabling patients and doctors to manage reports, appointments, and departmental workflows efficiently.

Real Estate

- Built a Real Estate Management System for managing properties, clients, and transactions, with features for listings, inquiries, and property tracking

Employee Attendance Management System

- Developed an Employee Attendance Management System to track employee check-ins, check-outs, and attendance reports.

Education

Egyptian E-learning University, B.Sc. Computer Science & Information Technology Aug 2020 – Jul 2024

- GPA: 3.11
